

Sensitive data (in research)

Two things seem to be happening at the moment:

1. More emphasis on information security
2. (New) funder expectations around sharing data and reproducible research

Participant data project

1. The creation of a forum, talks, and workshops on sensitive data
2. Collaboration with InfoSec and greater coordination of support:

CUREC and other research ethics committees, Infosec (authority on recommended solutions going forwards), ITSS and research support staff in research groups, Libraries, Research support in ITS

3. Collaboration with external partners e.g. <http://ukanon.net/> and <http://ukdataservice.ac.uk/>
4. Proposal of new projects by researchers where these would benefit a significant portion of stakeholders

Projects, services, systems and expertise

1. Electronic Lab Notebooks

Survey: <https://sharepoint.nexus.ox.ac.uk/eInsurvey> (MPLS and Medical Sciences only)

2. Digital Safe (Brian Hicks)
3. Research File Service (Steven Young)

Expectations

This is the start of a process, we don't have all the answers and will need to work with you.

Future workshops will focus on solutions that will also be documented here:

<http://researchdata.ox.ac.uk/handling-sensitive-data/>

If you want to talk after the event:

researchdata@ox.ac.uk
